

Table of Contents

E	Executive Summary	
I	Introduction	
II	Industry 4.0	
	i. Evolution of Industry 4.0	
	ii. What is Industry 4.0	
III	Technologies of Industry 4.0	
	i Internet of Things	
	ii Robotics	
	iii Cloud computing	
	iv Big data Analytics	
	v Augmented reality & Virtual reality	
	vi Additive manufacturing	
	vii Mobility (AGV, Autonomous cranes)	
IV	Aluminium value chain	
V	Aluminium value chain and Industry 4.0	
	i Bauxite mining and Industry 4.0	
	ii Alumina refining and Industry 4.0	
	iii Aluminium smelters and Industry 4.0	
	iv Aluminium downstream and Industry 4.0	
	a Rolling Mills	
	b Extrusions	
	c Castings	
	v Aluminium recycling and Industry 4.0	
VI	Challenges and risks in implementing Industry 4.0	

VII	Conclusion	
------------	-------------------	--

VIII	Select list of vendors of Industry 4.0 solutions	
-------------	---	--

List of figures

2.1	Industry revolution vs. Complexity	
2.2	Industry 4.0 Transformation	
4.1	Aluminium Value Chain	
5.1	Bauxite mining – Process Flow	
5.2	Alumina refining – Process flow	
5.3	Rio Tinto's vision of its aluminium operations in the future	
5.4	Opportunities envisioned by Hydro through Automation	
5.5	Flat-rolled aluminium – Process flow	
5.6	Scrap collection and process flow
