

Table of Contents

E	Executive Summary	04
I	Introduction	05
II	Industry 4.0	06
	i. Evolution of Industry 4.0	06
	ii. What is Industry 4.0	07
III	Technologies of Industry 4.0	08
	i Internet of Things	08
	ii Robotics	08
	iii Cloud computing	08
	iV Big data Analytics	09
	V Augmented reality & Virtual reality	09
	Vi Additive manufacturing	10
	Vii Mobility (AGV, Autonomous cranes)	10
IV	Aluminium value chain	12
V	Aluminium value chain and Industry 4.0	13
	i Bauxite mining and Industry 4.0	13
	ii Alumina refining and Industry 4.0	16
	iii Aluminium smelters and Industry 4.0	19
	iv Aluminium downstream and Industry 4.0	23
	a Rolling Mills	23
	b Extrusions	26
	c Castings	27
	v Aluminium recycling and Industry 4.0	30
VI	Challenges and risks in implementing Industry 4.0	32

VII	Conclusion	33
------------	-------------------	-----------

VIII	Select list of vendors of Industry 4.0 solutions	34
-------------	---	-----------

List of figures

2.1	Industry revolution vs. Complexity	06
2.2	Industry 4.0 Transformation	07
4.1	Aluminium Value Chain	12
5.1	Bauxite mining – Process Flow	13
5.2	Alumina refining – Process flow	16
5.3	Rio Tinto's vision of its aluminium operations in the future	22
5.4	Opportunities envisioned by Hydro through Automation	22
5.5	Flat-rolled aluminium – Process flow	23
5.6	Scrap collection and process flow	30
