

Table of contents

	Executive Summary	04
I	Introduction	06
II	Aluminium – Industry overview	08
2.1	Aluminium value chain	08
2.2	World aluminium usage	09
III	Primary aluminium production & energy consumption	11
3.1	Primary aluminium production	11
3.2	Aluminium smelting: Hall-Heroult electrolysis process	12
3.3	Aluminium smelting: An energy-intensive process	13
3.4	Need to reduce energy consumption in primary production	15
3.5	Energy intensity and emissions of major producers	17
3.6	Aluminium smelting and regulations on emissions	22
IV	Technologies and energy efficiency in aluminium smelting	25
4.1	Electrode Technologies	26
4.2	Alternative Reduction Technologies	27
4.3	Energy efficiency technologies, initiatives & developments	29
4.4	Industry 4.0 and optimised energy usage	34
4.5	Recycled aluminium and energy efficiency	35
V	Power sources for aluminium smelting	37
5.1	Trend in smelting power consumption	37
5.2	Primary aluminium production and renewable power	38
5.3	Renewable energy grids and modulating aluminium smelters	40
VI	Conclusion	42

List of Figures

E.1	Primary aluminium production and energy intensity, 2008-2018	04
2.1	Aluminium value chain	08
2.2	World aluminium usage trend, 2014-2019 (million tonnes)	09
2.3	World aluminium usage, 2019 (by region, by end use & by product type)	10
3.1	Primary aluminium production trends, 2009-2019 (million tonnes)	11
3.2	World primary aluminium production across regions, 2019	11
3.3	Hall-Heroult electrolysis process	12
3.4	Smelter energy: Typical energy consumption	13
3.5	Primary aluminium production and energy intensity, 2008-2018	14
3.6	World: Average primary aluminium smelting energy intensity	15
3.7	Hydro: GHG emission intensity – electrolysis (tCO ₂ e per tonne aluminium)	17
3.8	Alcoa: CO ₂ equivalent emissions intensity (tCO ₂ e per tonne of metal production)	18
3.9	EGA: Direct (Scope 1) GHG emissions in the UAE (thousand tonnes of CO ₂ e)	20
3.10	Hindalco: Aluminium business GHG gas emission intensity, (tCO ₂ / MT)	21
4.1	Elysis	29
4.2	Hydro Smelter technologies & energy efficiencies	32
4.3	Hydro Smelter technologies & components	32
4.4	Modulating aluminium smelters	40

List of Tables

E.1	Primary aluminium smelting power consumption, 2008 to 2018 (GWh)	5
3.1	Alcoa: GHG emissions (million tCO ₂ e)	18
3.2	Rusal: Total direct emissions of greenhouse gases in million tCO ₂ e	19
3.3	Chalco: GHG emissions, 2017-2019	20
3.4	EGA: GHG targets (Scope 1 and 2) (CO ₂ e per tonne of aluminium)	20
4.1	Status of technologies for improving smelter energy efficiency and emissions reduction	25
4.2	APXe Aluminium Smelter technology	30
5.1	Primary aluminium smelting power consumption by source, 2008 to 2018	37
5.2	Aluminium smelting power consumption by source, 2018 (GWh)	38
