

Table of Content

1. Executive summary
2. Introduction
a. What is Digital Transformation
b. The various phases of Digital Transformation
3. Drivers of Digital Transformation
a. Data availability & storage
b. Computational power & IaaS
c. Business demand
d. 7 forces shaping everything in the digital age
e. Support from Ecosystem?
4. Key technologies for Digital Transformation
a. ERP
b. Peripheral technologies
c. Exponential technologies
i. Robotic process automation
ii. Industry 4.0
iii. AI & Machine Learning
iv. Intelligent Chatbot
v. Virtual & Augmented Reality
vi. Blockchain
viii. ChatGPT & AI based content generators
5. Technology revolutionizing the future of the aluminium industry
a. Advanced extraction techniques
b. Automation and robotics
c. Data analytics and AI
d. Lightweighting and design
e. Recycling and circular economy
f. Energy efficiency
g. Smart manufacturing
6. Digital Transformation in Aluminium Industry – key trends
a. Internet of Things (IoT) and Industrial Automation
b. Artificial Intelligence (AI) and Machine Learning (ML)
c. Data Analytics and Visualisation
d. Robotics and Autonomous Systems
e. Supply Chain Digitisation
f. Digital Twin Technology
g. Energy Efficiency and Sustainability
h. Cybersecurity

7. Digital Transformation in Aluminium value chain.....	
a. Bauxite mining.....	
b. Alumina refining.....	
i. Case study.....	
c. Primary aluminium.....	
i. Case studies.....	
ii. IoT technology for efficient cathode bar monitoring.....	
iii. IoT technology – Case studies.....	
iv. Robotics process automation.....	
v. RPA – Case study.....	
vi. Deployment of RPA in the Aluminium sector.....	
vii. Case Study.....	
viii. Data Collection in the Aluminium Smelter.....	
ix. Case study.....	
d. Downstream segment.....	
i. Digital Transformation in the downstream.....	
ii. The utilisation of digital technologies in the process of aluminium extrusion.....	
iii. Case study.....	
iv. Digital technologies used in the production of aluminium flat-rolled products.....	
v. Case study.....	
vi. Digital technologies used in the production of aluminium foil.....	
vii. Digital technologies conducted in the manufacturing of aluminium wheels.....	
viii. Case study.....	
ix. Digital technologies used in the production of aluminium wires.....	
x. Digital foundries casting techniques to create high-value turbine parts.....	
xi. Case study.....	
e. End user segments.....	
i. Industrial digital transformation gaining momentum in the end-use sector.....	
ii. Digitisation in the construction sector with the use of aluminium.....	
iii. Digital transformation in the automotive sector with the use of aluminium.....	
iv. Aluminium packaging sector undergoing digital transformation.....	
v. Digital technologies used in aluminium cans.....	
vi. Digital technologies impacted the aerospace industry, including using aluminium and other materials.....	

- f. Recycled aluminium.....
 - i. Changing the face of the aluminium scrap recycling sector with digital technology.....
 - ii. On-site waste management techniques.....
 - iii. Case study.....
 - iv. Sorting and material processing.....
 - v. Case study.....
 - vi. Mobile scrap metal processing.....
 - vii. Artificial Intelligence (AI).....
 - viii. Case study.....
 - ix. Block Chain Technology.....
 - x. 3D Printing.....
 - xi. Software.....
 - xii. Case Study.....

8. Futuristic digital innovations in aluminium industry

- a. Digital innovations for aluminium smelters
 - i. Digital smelters by GE digital
 - ii. Case study
 - iii. Camera by Hycast
 - iv. Elios by Fives
 - v. Automated guided vehicles
 - vi. AiRC-1000 by Automation Innovation
 - vii. Maritime logistics solution
- b. Global Aluminium companies that have embraced digital solutions
 - i. EGA’s collaboration with Microsoft for cloud computing
 - ii. Alba embraces VR technology
 - iii. Hydro deploys AVEVA™ PI System™ & HAL5000 pot control system
 - iv. China Hongqiao Group’s utilization of smart manufacturing systems
 - v. GCC adopts Vectra’s Attack Signal Intelligence technology
 - vi. Vedanta deploys IIoT & IoT technology
 - vii. BALCO incorporates T-Pulse HSSE Monitoring System
 - viii. Rusal uses aluminium ingots quality check network
 - ix. Rio Tinto

- 9. Role based questions on Digital Transformation poised by various stakeholders**
 - a. FAQs from CDO/CIO
 - b. FAQs from Investors
 - c. FAQs from Technology professionals
 - d. FAQs from IT Managers
 - e. FAQs from Service Providers
 - f. FAQs from OEMs
- 10. Top 15 major tools Aluminium industry may benefit from**
- 11. Digital leaders in the industry**
- 12. Online marketplace shaping the future of the aluminium industry**
 - a. Revolutionizing aluminium trade: How technology powers effortless transactions on online marketplaces
 - i. Price discovery
 - ii. Market segmentation
 - iii. Transaction security
 - iv. Dispute resolution mechanisms
 - b. Benefits for buyers
 - i. Access to a wide range of suppliers
 - ii. Competitive pricing
 - iii. Security & transparency
 - iv. Time and effort savings
 - c. Benefits for sellers
 - d. Case Study
- 13. Conclusion**
