#### APPLICATION:

Coverall 88 helps remove slag / dross built-up on the furnace walls and floor. After the molten aluminium has been drained from the crucible / furnace, sprinkle this flux on the walls of the furnace (while it is still hot) and start the burner. Then scrape out the dross from the walls.

#### ADVANTAGES:

1. Helps remove hard slag and dross built-up on the walls.
2. Avoids contamination for the second batch.
3. Helps protect the furnace lining and bricks.
4. Increases capacity of furnace.
5. Improves life of Furnace.
